

# **GOPEN'S UNIQUE AND POWERFUL SCHOLARSHIP FOR CLEARLY WRITTEN AND CLEARLY UNDERSTOOD WRITTEN COMMUNICATION.**

Science career mentor:

In the life of the competitive grant funded science investigator, nothing is more important than publication in peer reviewed journals or the winning of competitive grant funding. Nothing.

In the life of many, competitively funded and would be competitively funded science investigators one thing and one thing only stands in the way of funding and better funding.

Simply stated, poorly written, unclear communication is the Achilles' heel of scientific progress. Progress at all levels.

For nearly every person, laboratory, department, or institution engaged in any way in science research, the most powerful additional training necessary to be learned is in the mastering and continuously applying of the scholarship of clear written communication. Powerful clearly written communication is what we and we alone teach.

No one can afford to be second in the competition of clear written communication. That is more than too expensive, it can be and frequently is, career ending.

Please carefully read our unique and in-depth web-site at <https://www.georgegopen.com/>.

If anyone will put significant resources into the learning and applying of clearly written communication they will prosper far beyond their wildest dreams. Promise.
